# GoChannel®

Understand your water movements and measure channel height at any time

GoChannel allows you to accurately and reliably measure channel height at any time of day. Eliminate the task of manually checking channels or pumps, simply access the information in real-time through our easy-to-use app.

You can review the current and historic data to build an accurate water inventory to determine the volume of water used in the field and lost through evaporation/seepage. GoChannel can help you enhance your irrigation and operational efficiency by reducing manual monitoring.

"The power outs on the river can be an issue during summer storms and many of our pumps are on different grids so when the storm hits at 2am, being able to see the pump is still going with GoChannel, is a game changer for us.

If it has stopped, knowing if it restarted itself is important. When you don't have visibility of that in the system, you need to do the 32km round trip during a storm, and this might need to be done 3 times in one night. It has potential for ripping up roads and transporting disease as well as being pretty dangerous for the workers."

- Stu Denston, Trangie

Key benefits

Accurate measurement

You can accurately and reliably measure channel height without manually checking.

Data dashboard

All your data is quickly accessible in our easy-to-use app, you can access current and historical data.

Reduce costs

Eliminate the need for manual checking, and always have a record in hand.

Improved efficiency

Improve your productivity with real-time channel height monitoring. Updated every 15 minutes, this device allows you to get on with your day while your channel fills and also reduces the chance of blowing out a channel.

Easy install and maintenance

This device is simple to install and even easier to maintain.

Affordable planning

The time saving benefits of this device outweigh the minimal investment.

Specifications

## Level range

0 - 6 metres

Operating temperature range

-15 to +60 degrees

Accuracy

± (1+S*0.5%) cm

IP rating

IP66

Other products you may also like

GoTank®

Understand how much water you have available in your header tanks, comes complete with a handy alert system to notify you when the water level crosses your pre-defined threshold.

GoStorage®

Clearly see what water is being used, pumped and evaporated as well as what is in storages and channels to greatly improve your water use efficiency.

GoWeather®

Store all your weather data in our easy-to-use app, this device measures temperature, humidity, wind speed/direction, rainfall, solar radiation, dew point, Delta T, ETO and more.

GoFuel®

Eliminate the need to manually check your storage tanks and pump sites, always have a record in hand of how much fuel you have so you can place orders with ease.

Head to our website to learn more about this product or our GoSense range or contact our team to place your order.
