

GoFuel®

Tracking fuel levels in your storage tanks and pump sites can now be done in the palm of your hand

No longer do you need to manually check or guesstimate your fuel levels. With our GoFuel device, you can simply check our easy-to-use app and get real-time updates on all your fuel sources. Allowing you to place your order with confidence and never run out of diesel again.

With the choice of LoRaWAN and satellite connectivity, your data remains at your fingertips. Embrace efficiency as manual checks become a thing of the past, and a constant record of your fuel quantity is readily available. Enhanced tracking capabilities allow you to delve into both current and historical volumes and usage, enabling the identification of discrepancies and refining reconciliation processes.

CANNOT be used in unleaded petrol or AvGas.

Key benefits

Accurate measurement

You will know exactly how much fuel you have instantly to place orders with ease.

Data dashboard

All your data is quickly accessible in our easy-to-use app, with both LoRaWAN and satellite connectivity options.

Reduce labour

Eliminate the need to manually check your tanks and pumps, and always have a record in hand of how much fuel you have.

Improved tracking

You can access current and historic volume and usage to easily identify losses and improve reconciliation.

Easy install and maintenance

This device is simple to install and even easier to maintain.

Affordable planning

The time saving benefits of this device outweigh the minimal investment.

Specifications

Level range

0 - 6 metres

Operating temperature range

-20 to +70 degrees

Accuracy

0.25%

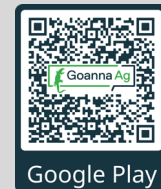

IP rating

IP66
